To whom it may concern,

09 June 2022

Previously, we only had a retail outlet and visibility on 3rd Party Market places. Wanting to create an E-commerce platform with a user-friendly interface, we enlisted the help of Websentials for this project. Although the web development took slightly longer than expected, we have always received consistent updates from the team. Special thanks to Adrian for being so responsive to our requests - be it improving the backend modules or product uploading. With his help, we were able to carry out a seamless integration of a 3rd Party logistics provider for orders fulfilment. Overall, it was great working with Websentials! Keep up the good work!
